

Capability Statement

**JB Contracting
offers a full range
of services to the
exploration and
mining sectors
throughout
Western Australia.**

Why choose us

Our experienced and knowledgeable team have the expertise to tackle any job. We take pride in our ability to meet the unique needs of each client, and our commitment to customer satisfaction is evident in the quality of our work.

JB Contracting was originally formed to support Topdrill's exploration services throughout regional Western Australia.

Since our inception, we have grown to become a trusted exploration services partner throughout the Western Australia region; and with our headquarters conveniently located in Kalgoorlie, we are perfectly positioned to meet the diverse needs of our clients.

Our fleet of equipment allows us to provide a full suite of services for the complete project lifecycle.

The business is led by Jason Brown who brings a wealth of experience in earthmoving and quarry services to this solution-focused company.

Jason's passion and experience delivers an exceptional understanding of the expectations of our customers and offers strategic growth and operational excellence to this new part of the greater Topdrill group.

Our Equipment

Our Services

JB Contracting offers a full range of services including grid lines, drill pad preparation, post-drill campaign rehabilitation, to site clearing, earthworks, road construction, road maintenance, site services, civils, dust suppression, logistics and waste dump rehabilitation.

We pride ourselves on having experienced operators that are well trained, resourceful, resilient, and competent to meet the expectations of the most demanding of environments throughout regional Western Australia.

Excavator with 3m scarifier for site scarification & vegetation spreading.

Loaders with custom built frontmount scarifier & rear rippers.

Our Values

People. Pride. Performance.

Our values drive the way we work, delivering results that exceed clients expectations whilst ensuring employee safety and wellbeing.

People.

- Work Safe, Home Safe - Zero Harm.
- Attracting and retaining the top tier in highly skilled and resourceful staff.
- We communicate with honesty and integrity to build and maintain relationships.
- We look after our people and our environment, encouraging cultural diversity in our workplace and encourage employment and training of Indigenous people from tribes local to work area.

Pride.

- We take pride in our reputation, service and our future.
- We do what we say we will do when we will do it, utilising the best of resources, with punctuality.
- We are passionate to be industry leaders in earthworks and contracting.

Performance

- We aim to set the benchmark for industry performance.
- Efficiency, Innovation, Capacity, Reliability, Capability.
- Robust health and safety systems and modern, fit-for purpose equipment.

Safety - Work safe, home safe. Zero harm.

We give workplace safety an unconditional priority.

Understanding that our people underpin the performance of our business, we strive to ensure a safe and healthy working environment at all times.

This is achieved through ensuring the competency of our staff along with regular training and the use of modern, well-maintained equipment and systems. We have implemented and will continue to develop processes designed to keep our team and clients safe at all times, such as the recent addition of the Jesi Journey Management System.

Training - A strong commitment within our team.

Our training is the key to ensure our team can deliver a high standard are competent and able to work safely in all environments.

We utilise the PeopleTray safety and compliance system for all our management tools.

This system connects our team to all departments within our business from safety compliance, timesheets, rosters, and health and safety reporting. It increases our business 'visibility', builds strong communication and improves our collaboration within our business.

Equipment

We operate & maintain a wide range of plant & equipment, including specialised scarifying rehabilitation equipment. Whatever your project requirements, we have the ability to provide the necessary resources to complete it to the highest standards.

We currently operate a fleet of 25 pieces of equipment including:

- Front End Loaders with rippers 5 – 35ton
- Excavators- Tracked/Wheeled- 15- 35 ton including all buckets, rippers, rock breakers and scarifying rakes
- Graders Cat 140 M's Skidsteers Dozers up to D10 Floats up to 50 ton
- Water carts 12,000 – 30,000 ltrs Rollers
- Service trucks

We strive to deliver all projects, to specification, on time, on budget, with safety as a priority.
